Some features include: AutoCAD supports DXF standard and GDS as a default format for a drawing. DXF support includes a "GetInfo" command that provides information about each drawing element. DXF and GDS files can be imported to AutoCAD and exported. DXF and GDS files can be used for "doit" operations on other drawings. DXF files can be loaded as the source of a drawing. DXF files can be loaded as a source for a drawing. DXF and GDS files can be modified in a drawing. GDS and DXF files can be exported as BMP, PNG and GIF formats.
